Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-19	YES
	Claims	NONE	NO
Inventive step (IS)	Claims	2-19	YES
	Claims	1	NO
Industrial applicability (IA)	Claims	1-19	YES
	Claims	NONE	NO

2. Citations and explanations (Rule 70.7)

The argument submitted on 26 October 2005 states that the technical feature of comparing the identification information contained in the contents and the identification information of the terminal and determining if they are identical to each other is not disclosed in the document JP 2003-198718. However, the description of the document (paragraphs 16-18) shows the description similar to said technical feature, and a person skilled in the art would have arrived at the claimed feature without the exercise of inventive skill.

In addition, the connecting means of the contents server, the means for transmitting and storing contents are similar to the elements in the cited document. Accordingly, a person skilled in the art would also have arrived at said features without technical difficulties.

Therefore, claim 1 is still considered to lack an inventive step.
